PREDOMINANT TERPENES

Terpinolene Beta-Caryophyllene Ocimene

DESCRIPTION

Banana Kush is an indica-dominant hybrid cannabis strain that has the scent of a ton of bananas. It was created by crossing a Ghost OG with Skunk Haze. It is a high-THC strain with a nicely-balanced effect that is both relaxing and euphoric at the same time. It is social and creative and is useful for lifting anxiety and depression. Expected effects are creative, euphoric, happy, relaxing, talkative, and uplifting.

PARENT #1: Ghost OG

Indica-Dominant Hybrid

Breeder: ORGNKID

Lineage: OG Kush

Ghost OG, a cut of OG Kush, is a hybrid strain loved for its balanced cerebral and body effects. Often described as simultaneously potent and non-intrusive, Ghost OG has won itself Cup awards and renown among consumers. Its strong citrus smell and crystal-covered buds hint at this strain's strong genetics and its ability to annihilate pain, insomnia, depression, and anxiety.

PARENT #2: Skunk Haze

Sativa-Dominant Hybrid

Breeder: Mr. Nice

Lineage: Skunk x Haze

Probably two of the most influential strains used in breeding the past decades. This strain has it covered for young and old alike. It is moderately high in potency, has an enduring body high, and is good for alleviating the levels of anxiety alongside stress-oriented symptoms. Its aromatic essence includes that of earthy musk with a touch of citrus haze.
