DESCRIPTION

MAC 1, also known as “Miracle Alien Cookies” is an evenly balanced hybrid strain (50% indica/50% sativa). The effects start in the head with a rushing euphoria that fills your mind with an expansive happiness, gently easing away negative or racing thoughts and replacing them with creative motivation and pure happiness. A relaxing body high accompanies this cerebral lift, keeping you tethered to the world below as your mind soars higher and higher. These heavy effects make MAC 1 perfect for helping those suffering from conditions such as chronic pain, mood swings, chronic fatigue, depression and chronic stress.

PARENT #1: Alien Cookies

Indica-Dominant Hybrid

Breeder: Jaws Gear

Lineage: GSC x Aliendawg

Jaws Gear Genetics gave us Alien Cookies by crossing GSC with Aliendawg. It is said to have pungent earthy and vanilla flavors coming from dark colored buds that are drenched in trichomes. It is hard to find, so if you get your hands on Alien Cookies, make sure to savor every moment.

PARENT #2: Colombian x Starfighter

Sativa-Dominant Hybrid

Breeder: Capulator

Lineage: Colombian Starfighter

Bred by Capulator, the father of MAC1 is Colombian x Starfighter which is a cross between a Colombian landrace strain and Starfighter (bred by Alien Genetics). These seeds were almost destroyed by the breeder and then saved only resulting in 1 male plant. That one male plant was used to pollinate Alien Cookies to provide us with MAC1.
